Cornell University Library announces partnership with Microsoft that will allow global access to its world-class resources

ITHACA, N.Y. — Cornell University Library will soon be able to offer more of its exceptional resources to scholars worldwide, thanks to a long-term partnership with Microsoft to digitize a significant number of its books and to put the volumes online using Live Book Search service.

Oral History Interview with Madale L. Watson
by Madale L. Watson

Results in this book:

Subject: Watson, Madale L.; Voorhis, Jerry, 1901-; Unruh, Jesse, 1922-1987; Calif...

Summary

Mrs. Watson discusses her work for James Harvey Brown's campaigns for the Fifty-sixth Assembly District, her appointment to the Democratic State Central Committee in 1950, and running unsuccessfully for the Fifty-eighth Assembly District in 1952. In addition to her political involvement Mrs. Watson is active in community affairs.
Book search winding down

Today we informed our partners that we are ending the Live Search Books and Live Search Academic projects and that both sites will be taken down next week. Books and scholarly publications will continue to be integrated into our Search results, but not through separate indexes.

This also means that we are winding down our digitization initiatives, including our library scanning and our in-copyright book programs. We recognize that this decision comes as disappointing news to our partners, the publishing and academic communities, and Live Search users.

Given the evolution of the Web and our strategy, we believe the next generation of search is about the development of an underlying, sustainable business model for the search engine, consumer, and content partner. For example, this past Wednesday we announced our strategy to focus on verticals with high commercial intent, such as travel, and offer users cash back on their purchases from our advertisers. With Live Search Books and Live Search Academic, we digitized 750,000 books and indexed 80 million journal articles. Based on our experience, we foresee that the best way for a search engine to make book content available will be by crawling content repositories created by book publishers and libraries. With our investments, the technology to create these repositories is now available at lower costs for those with the commercial interest or public mandate to digitize book content. We will continue to track the evolution of the industry and evaluate future opportunities.

As we wind down Live Search Books, we are reaching out to participating publishers and libraries. We are encouraging libraries to build on the platform we developed with Kirtas, the Internet Archive, CCS, and others to create digital archives available to library users and search engines.

In partnership with Ingram Digital Group, we are also reaching out to participating publishers with information about new marketing and sales opportunities designed to
Preservation Framework

THE Old-Irish poem here printed and translated for the first time has for its theme the disappearance of the pagan world of Ireland and the triumph of Christianity, as exemplified by the deserted ruins of the ancient hill-fort of Alton in contrast with the flourishing state of the neighbouring Killarne. Indeed the poem reads like an amplification of Oengus’s lines in the Prologue to his Félice:

*Borg Alliano stailtach \ athbhith h'ise sheilaghch*;

is nor Béigil boindích, \ is cin a cuimh dìcheidh.

‘Alton’s proud citadel has perished with its warlike host; great is victorious Béigil, fair is her multitudinous cemetery.’

The hill of Alton, now called Knockavilla, is situated in the county of Kilkenny, not far from Old Killean, and still contains vestiges of what was the largest fort in Ireland after Emúa Mhacha. It has often been described.  

1 See The Martyrology of Oengus, ed. by W.H. Stukeley, 1806, p. 25.

2 This is the oldest form of the name, a feminised *- healed, making its genitive *Alliano and its dative and accusative *Allian. Forms with * appear early, and in the latter half of the ninth century the genitive *Alain occurs, as if the nom. were Allan. See BE, XX, p. 10 (i.e. *already Alía and L.I. 455 (Oíce Alainn, spc. Alía 389)).

3 By folk-etymology, as if Oíce Allian ‘Delightful Hill’.

4 As e.g. by the late Mr. T.O. Russell in C.L., IV, p. 540.
