

# 3D Imaging

**See multi-dimensional images of your item(s) as you've never seen before.**

*"Rendering a manuscript as 3D reminds us of its multi-dimensionality and that it is far more than the two-dimensional surface which we are so used to being presented with in displays and exhibitions. This digital service enabled us to experience the physicality and form of the Ethiopic manuscript, helped us to intuit its tactility, when we couldn't touch it, and projected it as a vital object, which, of course, it would have been in the original stage of its 'life story'."*

**Armand De Filippo**

School of Museum Studies,  
University of Leicester

## **Process**

Bring your item(s) to our London studio where technical experts will set up our specialist 3D-rig specifically for you. Multi-shot photography will be processed using photogrammetry to create an interactive 3D model.

## **Benefits**

Enhance the experience with your item(s) in an innovative and sensory way. Reveal details not seen by the naked eye. Preserve the original whilst still interacting with its images. Share it with new and existing audiences around the world.

**Speak to one of our experts to discuss your requirements further.**
