This governs the relationships between the territory in Europe and the overseas territories of Netherlands Antilles and Aruba, which are part of the Kingdom. The texts of both Charter and Constitution appear in a recent English version:

## 11. STATISTICS

### 11.1 Introduction

The Libraries have an extensive set of Netherlands government statistics, backed up by other, non-Governmental statistics collections. The British Library's collections of foreign government material, including statistics, are stored in Yorkshire. Please contact the Enquiry Desk in the Social Sciences Reading Room for advice on ordering.

At the Library, London School of Economics and Political Science, the most recent Netherlands statistics are to be found in the Statistics Collection on the 1st floor at classmark 492. The earlier years of this material are in the Historical Statistics Collection on the Lower Ground floor of the Library - also at classmark 492. However, bear in mind that a good deal of statistical material will be found in the normal Netherlands government section at GOVT.PUBNS.492 (...).

Official statistics were published by the Centraal Bureau voor de Statistiek (CBS) (Netherlands Central Bureau of Statistics) until 3 January 2004, when Statistics Netherlands became an autonomous agency with legal personality taking over the responsibility for the majority of Dutch statistical publications covering the economic and social life of the whole country. There is no longer a hierarchical relationship between the Minister of Economic Affairs and the organisation. Statistics Netherlands publishes much information only through its website at <http://www.cbs.nl>. The English version appears at: <http://www.cbs.nl/en-GB/default.htm>.

### 11.4 Censuses

The first nation-wide census was conducted in 1795 under the Batavian Republic, and the last in 1971. From 1829 onward, censuses were held every ten years. The 1940 census was postponed until 1947 because of the war. No population census has been held in the Netherlands since 1971 because of growing privacy consciousness (and refusal to take part) among the general public.

However it is said that ongoing 'rolling' censuses have replaced the former decennial counts. As an official census has not been conducted the material must be collected from other sources such as birth and death registration. Information current and historical can be found on the Statistics Netherlands website at <http://www.cbs.nl/nl-NL/menu/themas/default.htm> under – Bevolking.

All tables concerning population are in the databank StatLine, the central database of Statistics Netherlands. StatLine contains the complete database of statistical information available from Statistics Netherlands and can be accessed at <http://statline.cbs.nl/StatWeb/?LA=en>
